EDUCATION

Regional College of Management   Bhubaneswar, Khurda
Degree in Master of Computer Application   2022 - 2024
GPA: 8.14

Kendrapara Autonomous College   Kendrapara
Computer Science Bachelor in Science   2019 - 2022
CGPA: 7.93

Tarini SC. Residential HS SCH.   Marshaghai, Kendrapara
Degree in Intermediate in Science   2017 - 2019
Percentage: 60%

EXPERIENCE

Seeree Services | Full-Stack Web Developer   Bhubaneswar, Odisha | June 2023 - Present

1. As a recent graduate of a Full-Stack Web Development course, I have honed my skills through various projects, including Simple Calculator, Landing Page, and Portfolio Website. Currently, I am engaged in a new project aimed at leveraging my expertise to develop a comprehensive web application.

2. This project endeavors to create a dynamic and user-friendly web application tailored to address specific needs within a chosen domain. Through meticulous design and meticulous implementation of both front-end and back-end functionalities, the project aims to deliver a seamless and intuitive user experience. Emphasizing efficiency, scalability, and security, this endeavor showcases my proficiency in modern web development technologies and methodologies. With a focus on meeting client requirements and industry standards, the project underscores my dedication to delivering high-quality solutions in the ever-evolving landscape of web development.

Prodigy InfoTech | Web Developer Intern   April 2024 - May 2024

During my tenure as a Web Development Intern at Prodigy InfoTech from April 2024 to May 2024, I actively contributed to various projects aimed at honing my skills and expanding my expertise in web development. Some of the key projects I worked on include:

1. Responsive Landing Page: Designed and developed a responsive landing page using HTML and CSS, ensuring optimal viewing experience across different devices and screen sizes. This project demonstrated my proficiency in frontend development and responsive design principles.

2. Stopwatch Web Application: Created a stopwatch web application using HTML, CSS, and JavaScript, allowing users to accurately measure time intervals with ease. This project showcased my ability to utilize frontend technologies and JavaScript programming skills to develop interactive web applications.

3. Tic-tac-Toe Web Application: Developed a tic-tac-toe web application using HTML, CSS, and JavaScript, providing users with an interactive gaming experience. This project highlighted my problem-solving abilities and proficiency in frontend development.

4. Personal Portfolio Website: Designed and prototyped a personal portfolio website using Figma, showcasing my skills, projects, and experiences in a visually appealing manner. This project demonstrated my creativity and ability to utilize design tools effectively.

5. Weather App: Developed a weather app that fetches weather data from a weather API based on the user's location, providing real-time weather updates and forecasts. This project showcased my ability to integrate third-party APIs and build functional web applications.

Through these tasks, I gained hands-on experience in frontend development technologies such as HTML, CSS, and JavaScript, as well as valuable exposure to design tools like Figma. Additionally, I enhanced my problem-solving abilities and learned to integrate third-party APIs to create functional and user-centric web applications.

SKILLS

Programming Languages: C, Java, Python
Libraries/Frameworks: HTML/CSS, JavaScript, AngularJS, ReactJS, Bootstrap, JSP

Tools / Platforms:	Git/GitHub, Eclipse IDE, VS Code, Sublime Text, XAMPP, Tomcat, Postman, Figma
Databases:	SQL, MySQL, MongoDB

PROJECTS / OPEN-SOURCE

Hospital Management System   *HTML/CSS*

I've completed a Hospital Management System project using HTML and CSS during my Bachelor's program. This project aimed to simplify administrative tasks within healthcare facilities. With a focus on frontend development, I created an intuitive interface allowing staff to manage patient records, appointments, and medical inventory efficiently. This project underscores my ability to apply web development principles to practical solutions and showcases my proficiency in HTML and CSS.

Mucy Music Player   *HTML/CSS*

I developed a Music Player project called "Mucy" using HTML and CSS. This project aimed to create a user-friendly interface for playing music files. Leveraging HTML for structure and CSS for styling, I created an intuitive design that allows users to easily navigate and control their music playback. This project not only showcased my proficiency in frontend web development but also provided practical experience in designing interactive and visually appealing interfaces for multimedia applications.

Personal Portfolio Website   *HTML/CSS, Bootstrap, JavaScript,*

During my MCA program, I created a Personal Portfolio Website using HTML, CSS, Bootstrap, and JavaScript. This project served as a showcase of my skills, experiences, and projects to potential employers and collaborators. Leveraging HTML for structure, CSS for styling, Bootstrap for responsive design, and JavaScript for interactivity, I developed a visually appealing and user-friendly website. The portfolio website featured sections such as an about me, resume, projects, and contact information, allowing visitors to learn more about me and my work. This project not only demonstrated my proficiency in frontend web development but also highlighted my creativity and ability to design and implement professional-grade websites.

E-Commerce Website (FreshMart)   *HTML/CSS, Bootstrap, JavaScript, MySQL*

During my MCA program, I embarked on a significant project titled "FreshMart," an E-Commerce Website aimed at empowering small farmers to maximize their profits by selling their products online. While the frontend development is complete, the backend is currently under development. FreshMart serves as a platform for small farmers to showcase and sell their products to a broader audience, providing them with access to a larger market and increasing their earning potential. Through this project, I gained valuable experience in frontend web development, including designing user interfaces and ensuring seamless user experiences. Additionally, I am actively involved in developing the backend functionalities, which will include features such as product management, user authentication, and secure payment processing. This project not only demonstrates my technical skills but also reflects my commitment to leveraging technology for social and economic empowerment.
